

YOUSENDIT, APPLIAN PARTNER ON PRODUCT THAT RECORDS AND DELIVERS LARGE STREAMING MEDIA FILES VIA THE WEB

Partnership allows customers to retrieve recorded online media anywhere

MOUNTAIN VIEW, Calif. and SAN ANSELMO, Calif.— June 26, 2007 – YouSendIt, Inc., the world’s most trusted digital content delivery service and Applian Technologies, the global leader in software products for recording streaming media, has just announced the release of **Applian Media Courier powered by YouSendIt**. This solution will allow Applian customers to retrieve their recorded media anywhere they have Internet access. The combined offering will enable customers to send, receive, convert, and track media with Applian’s Replay A/V 8 and YouSendIt’s Web-based file delivery service.

The Applian Media Courier allows customers to receive captured streaming media files anywhere. For example, a home PC can record a radio show, and customers are able to listen to that show while at work or travelling; anywhere they can access the Internet.

“YouSendIt prides itself on making sending and receiving large files easier for its users,” said Ranjith Kumaran, founder of YouSendIt. “The integration of YouSendIt into Replay A/V 8 will now allow Applian Media Courier users to send files directly from their workflow, eliminating the frustrations associated with using FTP servers, encountering e-mail bounce-backs or burning a CD and sending it via overnight mail.”

“We are extremely excited about our partnership with YouSendIt. Adding the YouSendIt service to Replay AV makes it easy for your recorded media to follow you wherever you are. Our present and future customers are going to be thrilled,” said Bill Dettering, CEO, Applian

Replay A/V makes it easy to record all types of online media. Several hundred thousand Applian customers already benefit from the ability to record almost any streaming audio and video instantaneously, or schedule recordings to happen automatically later. The integrated Replay Media Guide lets users pick shows to record with a single click. Replay A/V is the only software that combines Stream Capture, Audio Recording and an Enhanced Podcast Client in one easy-to-use interface.

The Replay A/V YouSendIt integration is available in multiple versions, including two free options. **Applian Media Courier Lite** offers free transfers of files as large as 100MB with a download bandwidth limit of 1GB each month. **Applian Media Courier Business Plus** provides file transfers as large as 2GB with a 40GB download bandwidth limit per month and is available free for an initial 30 day trial. Accessing the YouSendIt option within Replay AV is achieved by simply checking a box.

About YouSendIt

Based in Mountain View, CA, YouSendIt is the trusted global leader in digital content delivery, empowering business professionals to send, receive and track files on-demand. YouSendIt’s reliable service provides a convenient e-mail attachment solution, an easy-to-use FTP replacement, and eliminates the need to send files on disk with an overnight courier service. Its flexible range of services and partnership programs make YouSendIt the number one choice of business professionals. With more than four million registered users from 220 countries, YouSendIt transfers over 30,000 GB per day and over 500 million files to date. For more information and to send digital content the smart way, visit <http://www.yousendit.com>.

About Applian Technologies

Applian Technologies was started by Bill Dettering in 2000 with the launch of Replay Radio, a program Bill created to combat the boredom of his long commute down to Silicon Valley every day. Replay Radio allowed Bill to listen to his favorite radio programs whenever he wanted. Helping people get more enjoyment out of streaming media is what Applian Products are all about. Now, seven years after the launch of Replay Radio, Applian is recognized as the global leader in recording software. Other popular Applian products include the Audio Video Streaming Capture Suite, Replay Media Catcher, Replay Music, Replay Converter, and Replay Screencast.
